ACKNOWLEDGEMENT

With all reverence, we take the opportunity to express our deep sense of gratitude and wholehearted indebtedness to our respected guide, **Prof. Nilesh Rathod**, Department of Information Technology, Rajiv Gandhi Institute of Technology, Mumbai. From the day of conception of this project, his active involvement and motivating guidance on day-to-day basis has made it possible for us to complete this challenging work in time.

We would like to express a deep sense of gratitude to our respected **Head of the Department, Dr. Sunil B. Wankhade**, who went all the way out to help us in all genuine cases during the course of doing this project. We wish to express our sincere thanks to **Dr. Sanjay Bokade, Principal**, Rajiv Gandhi Institute of Technology, Mumbai and would like to acknowledge specifically for giving guidance, encouragement and inspiration throughout the academics.

We would like to thank all the staff of Information Technology Department who continuously supported and motivated during our work. Also, we would like to thank our colleagues for their continuous support and motivation during the project work. Finally, we would like to express our gratitude to our family for their eternal belief in us. We would not be where we are today without their support and encouragement.

ABSTRACT

RTO management system project is prepared for RTO office to maintain all records like 2-wheeler registration, 3-wheeler registrations, learning license and driving license, changing of address, renewal form and much more. These are the main activities of RTO office. The administrator is a power user, he has the power to verify the data and provide appropriate solutions. By introducing the new system, we have been organized some striking facilities. Registration of vehicle through online. Fancy number selection of vehicles through online. Issues of information about the licence, which includes application forms and license test and other information. In the existing system of RTO office perform functions such as registration, license and fitness. Regional transport office is the organization of the Indian government responsible for maintaining a database of vehicles for various states of India. The RTO issues driving licenses organizes a collection of vehicle excise duty and sells personalized registrations. These are the main activities of RTO office; we developed this software application with a fully computerized method to manage all the data. At present all records are maintained manually.
